

ACCREDITED PHARMACY CONTINUING EDUCATION INVITATION

Insulin Injection Technique in Diabetes: When, where, and how may be more important than what

FACULTY

Lori Berard,
Nurse Consultant,
Winnipeg, Manitoba

Shelita Dattani,
PharmD, RPh,
Speaker, CE
Consultant, Pharmacist,
Ottawa, Ontario

You are cordially invited to register to an **accredited learning session** on practical educational interventions pharmacists can use with their patients living with diabetes.

→ • **Click HERE** • ←
(www.injectiontechnique.ca)

to create your account and access the Platform.

On the Platform you will find:

- Pre-test questionnaire
- 30-minute video presentation
- Post-test questionnaire

It is estimated that to complete the program it will take you 60 minutes (1 CEU)

LEARNING OBJECTIVES

After participating in this program, learners will better be able to:

- Discuss how poor insulin injection technique may contribute to lipohypertrophy, affect insulin absorption and impact health outcomes of patients living with diabetes.
- Identify and communicate solutions that can help ensure healthy insulin injection site rotation and improved patient outcomes.
- Implement practical and efficient tactics in your practice to effectively communicate with patients and improve adherence to proper insulin injection technique.

The Canadian Council on Continuing Education in Pharmacy has accredited this independent study program for 1.0 CEU.

CCCEP Number: 1044-2022-3473-I-Z

Date Accredited: 2022-07-19 Accreditation Expiry Date: 2023-07-19

This program was supported in part by an educational grant from Roche Diabetes Care, a division of Hoffman-Laroche Limited. CA-1624
